

The variable slide equals 2 or 4

A colorDrop is created above the screen with the same size as the raindrops

The colorDrop is filled with random colors

The colorDrop falls down the screen

The colorDrop's size adapts the size of the other raindrops

Is the distance between the colorDrop and the catcher less than the colorDrop's radius (are they touching?)

No

You neither gain nor lose points or lives

You missed the colorDrop Power Up

Yes

5 points are added to your score

You have caught the colorDrop Power Up
